

DELIVERING CLOUD-NATIVE 4G/5G SOLUTIONS

We are helping organizations to seamlessly build, customize, and operate their private 4G/5G infrastructure by consolidating open RAN and cloud-native architectures with a green MANO/SMO offering more than 10x efficiency and delivery cycle with lower carbon footprint for a wide range of R&D and enterprise use-cases from the lab to the production environment.

BUBBLERAN DEVOPS TECHNOLOGY

This environment offer more than 10x efficiency and delivery cycle to develop, validate and release the 4G/5G network as a service. Its enables emerging operators to gain control over the whole network operations from day 0 to day n.

BubbleRAN technology is a turnkey 3GPP compliant 4G/5G solution ideal for R&D, PoC/MVP, and deployment. It includes multi-vendor eNodeB, gNodeB, 4GC, 5GC, and IMS for both Non-standalone mode (NSA) and Standalone mode (SA) deployment in frequency range 1 and 2 (FR1, FR2), with RAN intelligent Controller (RIC) and core network controller (CNC) as extensions, underpinning the network deployment and operation.
